From Palgrave Macmillan : Developmental Politics in Transition: The Neoliberal Era and Beyond (International Political Economy Series) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Developmental Politics in Transition: The Neoliberal Era and Beyond (International Political

Economy Series):

Blending theory and case studies, this volume explores a vitally important and topical aspect of developmentalism, which remains a focal point for scholarly and policy debates around democracy and social development in the global political economy. Includes case studies from China, Vietnam, India, Brazil, Uganda, South Korea, Ireland, Australia.

"This sober intellectual project is empirically packed and theoretically reflective in its insistence that '[e]ach system should be examined by reference to the structures, agencies, processes, power, and conflicts that are exercised in material provision'. Academics, students and practitioners of peacebuilding should find much of interest and relevance in its book. For me, its key contribution lies in how it debunks a number of central myths about neoliberalism." - Mandy Turner, Peacebuilding
