Richard Grabowski, Sharmistha Self, William Shields : Economic Development: A Regional, Institutional, and Historical Approach: A Regional, Institutional and Historical Approach before purchasing it in order to gage whether or not it would be worth my time, and all praised Economic Development: A Regional, Institutional, and Historical Approach: A Regional, Institutional and Historical Approach:

The second edition of this innovative and affordable book integrates environmental and financial sustainability into its distinctive regional approach. By focusing on political economy in its cultural, religious and historical roots, as well as leadership decisions, it spurs critical thinking. Working through the unique development paths of individual countries, the authors foster integrative thinking and a strong sense of realism about both the prospects and challenges of economic development in the rapidly evolving global economy. The book is exceptional in both its theoretical nuance and accessible writing. An Instructors Manual with discussion questions, a test bank, and PowerPoint slides is available online to professors who adopt the text.

"The book covers the intellectual ground that a liberally educated student needs to grapple with to understand the complexity of economic development. For many years political scientists and economists have presented overly simplistic models and frameworks for understanding economic development that cannot withstand critical analyses of many individual country cases. By focusing on political economy in its cultural, religious and historical roots, as well as leadership decisions, it spurs critical thinking. Working through the unique development paths of individual countries promotes integrative thinking and a strong sense of realism about both the prospects and challenges of economic development in our rapidly emerging global economy and highly conflicted global society." - Henry Smorynski, Provost, College of St. Benedict / St. John's University"
