Mark Skousen : Economic Logic Fourth Edition before purchasing it in order to gauge whether or not it would be worth my time, and all praised Economic Logic Fourth Edition:

4 of 4 people found the following review helpful. Excellent Economics Textbook By Jeff Launier I am just finishing up this book and this is a perfect book for any high school or college economics class, along with my favorite which is Peter Schiff's "How an Economy Grows and Why it Crashes." 1 of 1 people found the following review helpful. Four Stars By john williams Very good 3 of 4 people found the following review helpful. Great By Monica This is the best price I have found for this book and it got here fast and in brand new condition and is a paperback.

“Eureka! Skousen has done the impossible. Students love it! I will never use another textbook again.” —Harry Veryser, University of Detroit-Mercy They said it couldn’t be done. Austrian economics is so different, they said, that it couldn’t be integrated into standard “neo-classical” textbooks. Consequently, college students learn nothing about the great Austrian economists (Mises, Hayek, Schumpeter). Professor Mark Skousen’s Economic Logic aims to change that. Based on his popular course taught at Columbia University, Skousen starts his “micro” section with Carl Menger’s “theory of the good” and the profit-and-loss income statement to

explain the dynamics of the market process, entrepreneurship, and the advantages of saving. Then he uses a powerful Hayekian four-stage model of the economy to introduce “macro,” including a new Austrian measure of spending at all stages of production (Gross Domestic Expenditures). Economic Logic also offers chapters on: The international gold standard, the defects of central banking, and the Mises/Hayek theory of the business cycle. A full critique of the Keynesian Aggregate Supply and Demand (AS-AD) model, and a revolutionary Austrian alternative. Entrepreneurship, the financial markets, environmental economics, monetary policy and inflation, federal spending and taxes, and government regulation. Leaders of all schools, including Austrian, Keynesians, Marxist, Chicago, and Public Choice.
